*Prepared for the National Institute on
Aging/National Institute on Child Health and
Human Development*

Labor and Population Program

The RAND unrestricted draft series is intended to transmit preliminary results of RAND research. Unrestricted drafts have not been formally reviewed or edited. The views and conclusions expressed are tentative. A draft should not be cited or quoted without permission of the author, unless the preface grants such permission.

We recommend the following citations for the IFLS data:

For papers using IFLS1 (1993):

For papers using IFLS2 (1997):

Frankenberg, E. and D. Thomas. "The Indonesia Family Life Survey (IFLS): Study Design and Results from Waves 1 and 2. DRU-2238/1-NIA/NICHD.

Preface

This document provides an English translation of the household survey (HHS) questionnaire for wave 2 of the Indonesia Family Life Survey (IFLS2). It is the third of seven volumes documenting the IFLS2.

The Indonesia Family Life Survey is a continuing longitudinal socioeconomic and health survey. It is addressed to a sample representing about 83% of the Indonesian population living in 13 of the nation's 26 provinces. The survey collects data on individual respondents, their families, their households, and the communities in which they live. The first wave (IFLS1) was administered in 1993 to 7,224 households. IFLS2, administered in 1997, was addressed to the same sample. A follow-up survey (IFLS2+) was conducted in 1998 with 25% of the sample. The next wave is expected to be fielded in 2000.

IFLS2 was a collaborative effort of RAND, UCLA, and the Demographic Institute of the University of Indonesia (LDUI). Funding for IFLS2 was provided by the National Institute on Aging (NIA), the National Institute for Child Health and Human Development (NICHD), U. S. Agency for International Development (USAID), The Futures Group (POLICY Project), the Hewlett Foundation, the International Food Policy Research Institute (IFPRI), John Snow International (the OMNI project), and the World Health Organization. MACRO International developed the data-entry software and had responsibility for certain parts of the data processing.

The IFLS2 public-use file documentation, whose seven volumes are listed below, will be of interest to policymakers concerned about socioeconomic and health trends in nations like Indonesia, to researchers who are considering using or are already using the IFLS data, and to those studying the design and conduct of large-scale panel household and community surveys. Updates regarding the IFLS database subsequent to publication of these volumes will appear at the IFLS Web site, <http://www.rand.org/FLS/IFLS>.

Documentation for IFLS, Wave 2

DRU-2238/1-NIA/NICHD: *The Indonesia Family Life Survey (IFLS): Study Design and Results from Waves 1 and 2*. Purpose, design, fieldwork, and response rates for the survey, with an emphasis on wave 2; main results from both waves 1 and 2.

DRU-2238/2-NIA/NICHD: *Users Guide for the Indonesia Family Life Survey, Wave 2*. Descriptions of the IFLS file structure and data formats; guidelines for data use, with emphasis on using the wave 2 and wave 1 data together.

DRU-2238/3-NIA/NICHD: *Household Survey Questionnaire for the Indonesia Family Life Survey, Wave 2*. English translation of the questionnaires used for the household and individual interviews. Includes interviewer's instructions.

DRU-2238/4-NIA/NICHD: *Community-Facility Survey Questionnaire for the Indonesia Family Life Survey, Wave 2*. English translation of the questionnaires used for interviews with community leaders and facility representatives. Includes interviewer's instructions.

DRU-2238/5-NIA/NICHD: *Household Survey Codebook for the Indonesia Family Life Survey, Wave 2*. Descriptions of all variables from the IFLS2 Household Survey and their locations in the data files.

DRU-2238/6-NIA/NICHD: *Community-Facility Survey Codebook for the Indonesia Family Life Survey, Wave 2*. Descriptions of all variables from the IFLS2 Community-Facility Survey and their locations in the data files.

DRU-2238/7-NIA/NICHD: *Crosswalk between the Survey Instruments for the Indonesia Family Life Survey, Waves 1 and 2.*

Re-Release of IFLS1 Data

To facilitate using the IFLS1 and IFLS2 data together, a revised version of IFLS1 data has been released in 1999. Abbreviated IFLS1-RR (1999), the re-release incorporates adjustments outlined in the “fixes” files, joins subfiles having the same unit of observation, and adds identifiers that make it easier to link IFLS1 and IFLS2 data. The IFLS-RR data are available at <http://www.rand.org/FLS/IFLS> and are documented in

DRU-1195/7-NIA/NICHD: *Documentation for IFLS1-RR: Revised and Restructured Indonesia Family Life Survey Data, Wave 1.*

Previous Documentation for IFLS, Wave 1

DRU-1195/1-NIA/NICHD: *The 1993 Indonesian Family Life Survey: Overview and Field Report.* Purpose, design, fieldwork, and response rates.

DRU-1195/2-NIA/NICHD: *The 1993 Indonesian Family Life Survey: Appendix A, Household Questionnaires and Interviewer Manual.* English translation of the questionnaires used for the household and individual interviews. Includes interviewer’s instructions.

DRU-1195/3-NIA/NICHD: *The 1993 Indonesian Family Life Survey: Appendix B, Community-Facility Questionnaires and Interviewer Manual.* English translation of the questionnaires used for interviews with community leaders and facility representatives. Includes interviewer’s instructions.

DRU-1195/4-NIA/NICHD: *The 1993 Indonesian Family Life Survey: Appendix C, Household Codebook.* Descriptions of all variables from the Household Survey and their locations in the data files. Includes notes about cases that are known anomalies.

DRU-1195/5-NIA/NICHD: *The 1993 Indonesian Family Life Survey: Appendix D, Community-Facility Codebook.* Descriptions of all variables from the Community-Facility Survey and their locations in the data files. Includes notes about cases that are known anomalies.

DRU-1195/6-NIA/NICHD: *The 1993 Indonesian Family Life Survey: Appendix D, Users’ Guide.* Descriptions of the IFLS file structure and data formats; guidelines for data use, with emphasis on working with the household, individual, and facility IDs and making links across different parts of the survey.

Acknowledgments

A survey of the magnitude of IFLS2 is a huge undertaking. It involved a large team of people from both the United States and Indonesia. We are indebted to every member of the team. We are grateful to each of our respondents, who gave up many hours of their time.

The project was directed by Elizabeth Frankenberg (RAND) and Duncan Thomas (RAND and UCLA), who were the Principal Investigators. Lynn Karoly and Paul Gertler were Principal Investigators in the early stages of the project.

Bondan Sikoki was the Project Director appointed by the Demographic Institute of the University of Indonesia (LDUI). She served as the Survey Director during the design and implementation of fieldwork. Her unswerving commitment to maintaining the integrity and quality of IFLS2, in even the most difficult circumstances, was an inspiration to us all. Prior to her appointment, the LDUI Project Director was Dr. IGN Agung.

Three LDUI staff members served as Associate Project Directors. Wayan Suriastini directed the tracking phase of the study and played a central role in the design of the Household Survey Questionnaire. Muda Saputra coordinated much of the Community-Facility Survey fieldwork and data entry. Sutji Rochani Siregar oversaw the administration of the latter phases of fieldwork and data entry.

Data-entry software and field procedures for the Computer-Assisted Field Editing (CAFE) were developed by Trevor Croft, of MACRO International, with the assistance of Hendratno of LDUI. Croft also developed the software used for the final phase of data entry/data quality checks (Look Ups). Iip Umar Ri'fai, Martin Wolfe, and Linda Fitrawati assisted with these tasks.

Eko Ganiarto coordinated the first and second pretests. Victoria Beard worked extensively on the Community-Facility Survey. Endjang Pudjani and Sheila Evans were responsible for the technical production of the Indonesian and English questionnaires. Akhir Matua Harahap coordinated the writing and production of the survey manuals. Mary Linehan managed operations in Jakarta prior to fieldwork; she developed the assessments of physical health, along with Cecep Sukria Sumantri and Merry Widayanti. Nargis, Djainal, and M. Yusuf assisted with the development of the Community-Facility Survey and the training of its staff. Donavan Bustami coordinated printing and shipping for the questionnaires.

John Adams provided critical input for the design of the follow-up protocols and guided the development of sampling weights. Christine Peterson designed the preprinted rosters, assisted with questionnaire design and processing of the pretest data, and helped calculate the sampling weights.

The IFLS2 public-use data files were produced by a team based at RAND. The efforts of Paula Hamilton, Nancy Campbell, Melissa Chiu, Sue Polich, Patty St. Clair, Wayan Suriastini, and Peter Yau went well beyond the call of duty.

Many of our colleagues at RAND have contributed substantially to the survey. We are especially grateful to James P. Smith and John Strauss. We are also grateful to Kathleen Beegle, Julie DaVanzo, William Dow, Micki Fujisaki, Doug Gilbertson, Paul Gertler, Daryl Hill, Michael Hurd, Lynn Karoly, Jacob Klerman, Nancy Krantz, Donna Lee, Lee Lillard, Maria Menchaca, Eileen Miech, Jack Molyneaux, Mathew Sanders, Christine d'Arc Taylor, Jim Tebow, and Beverly Weidmer.

Much effort was put into designing IFLS2 so that it would yield information on topics of special concern in Indonesia and reflect the nation's distinctive social, economic, and policy environment. The input of a large number of scholars and policy-makers in Indonesia was key in this regard. Paramita Sudharto gave us considerable guidance on the overall survey and on its health components. Important contributions were made by Boediono, Mark Brook, Fasli Djalal, Herwindo Haribowo, Bachrul Hayat, Heryudarini, Yayah Husaini, Bambang Indrianto, Stephanus Indradjaya, Jiono, Robert Kim-Farley, Vanda Moriaga, Dr. Mujilah, Muljani Nurhadi, Ratna, Kusnadi Setjawinata, Soeharsono Soemantri, James Stein, Ace Suryadi, and Anton Wijaya.

The survey could not have taken place without the support of the LDUI directors and administrative staff, including N. Haidy Pasay, Sri Moertiningsih Adioetomo, Sri Hariati Hatmadji, Badrun, and Teguh. We are indebted to the Population Study Centers in each of the thirteen IFLS provinces, which helped us recruit the 400 field staff.

Finally, the success of the survey is largely a reflection of the diligence, persistence and commitment to quality of the interviewers, supervisors, and field coordinators. Their names are listed in the *Study Design* (DRU-2238/1-NIA/NICHD), Appendix A.
